

Green Hydrogen Webinar Series- 2

In partnership with the Hamburg University of Technology - TUHH, The Tunisian National Agency for Energy Conservation – ANME, the Hamburg Open Online University - HOOU and the German Engineers Association – VDI, the Council for Engineering Sciences – CSI/OIT is organizing a webinar series on Green Hydrogen.

The Webinar series, which is intended to raise the awareness and to build the capacities on green hydrogen, is a part of a wider initiative, aiming at setting up a joint Tunisian-German competence center and establishing a new value chain, based on renewable energies and green hydrogen.

The webinars will take place on a weekly basis, on Wednesdays at 19h00 and will be held in English, since speakers and attendees from both Germany and Tunisia, will participate in these webinars.

The second session is scheduled on Wednesday December 9th , 2020.

If you didn't already registered for the previous session and to participate in the upcoming session, please register online under the following link:
